Breakdown

What to lead with

Runs a floor without being supervised
Portuguese hotels are short of people who can be left with a floor, not of people who can clean a room.

Trained other people on chemical handling
It is the part of the job that carries legal weight here, and somebody who has taught it has done it properly.

What to work on

Spoken English under pressure
Twenty minutes a day of speaking out loud, not reading. The assessment measured comprehension; the interview measures speaking.

Portuguese, the first hundred words
Free apps are enough for the words a shift actually needs. It is the difference between following a handover and guessing at it.

What this report is, and is not

This is an assessment of sector knowledge, work experience and workplace English, taken online and unsupervised. It is not a certified language qualification and not a verification of employment history. The English figure reflects comprehension of workplace material, not a CEFR examination. Employers should treat it as one input among several, alongside interview and document checks. The English level on this report was produced by S&A Recruitment and is not certified by a third party.
